

Muhammad Miswan

AI Student | AI/ML Developer | Full Stack Developer

mmiswan2326@gmail.com • GitHub: github.com/mmiswan2326 • LinkedIn: linkedin.com/in/muhammad-miswan-9479673b1 • miswan.dev

Professional Summary

AI-focused developer building practical machine learning systems and full-stack products that turn ideas into useful user-facing tools. Experienced in Python, React, Next.js, and APIs for delivering end-to-end solutions from model experimentation to deployment.

Education

B.S. Artificial Intelligence — Dawood University of Engineering and Technology

In Progress

Experience

Machine Learning Intern — Remote

2025 — Present

Building and evaluating classification and prediction models, and shipping the APIs that serve them into production-facing tools using Python, FastAPI, and Scikit-Learn.

Full-Stack Development Intern

2024

Worked across the stack to build internal tools, focusing on React components, REST API integration, and reliable user interfaces.

Selected Projects

- AI Smart Study OS — AI-powered study companion for plans, summaries, and quizzes; built with Next.js, LangChain, FastAPI, and PostgreSQL.
- QualityVision AI — Computer vision system for automated visual quality inspection using OpenCV, Python, and Scikit-Learn.
- Personal Portfolio Website — Designed and built a modern portfolio experience with Next.js, TypeScript, Tailwind CSS, and animated sections.

Technical Skills

Programming Languages: Python, C++, JavaScript, SQL

AI / ML: Pandas, NumPy, Scikit-Learn, OpenCV, LangChain, LLM Applications

Web Development: React, Next.js, HTML, CSS, Tailwind, FastAPI, REST APIs

Databases: PostgreSQL, SQLite, MongoDB

Tools: Git, GitHub, Docker, Postman, VS Code

Certifications

Machine Learning Specialization • Python for Data Science • Deep Learning Fundamentals

Hackathons & Achievements

Saylani Hackathon • University AI Hackathon • Open Source Sprint

Soft Skills

Problem solving, collaboration, rapid prototyping, communication, ownership, and adaptability
